

NO BUTT? SABOUT IT!

Take a little from here...

and put a little there...

Looking in the derrière area? Want the “perfect” buttocks? Well, you have to be realistic but a more desirable shape and volume can be achieved.

Dr. Schilling is performing buttocks augmentation with micro-fat grafting which can create volume for a more curvaceous shape.

If you would like to learn more about the benefits and procedure, please call and schedule a complimentary consultation today!

What’s the “up”-side? You must have some “extra” fat in areas such as the abdomen, flanks, hips or thighs. This “extra” fat will be removed using a gentle liposuction technique with a special cannula to remove the fat cells.

The fat cells are then purified and injected into the desired area of the buttocks through small incisions.

Only 20-30% of the injected fat will be re-absorbed -- and because it’s your own fat there is no worry for rejection of the grafted fat!
